**We Are Learning To...**

# Learning Intentions

- Define evidence-based practice
- Reflect on the importance of EBP
- Review what is the latest evidence upon which to base our practice

What I'm Looking For...

# Success Criteria

- Be able to refine our understanding of EBP
- Consider what it means of our teaching
- Apply the most helpful practices to our teaching

# Why Evidence-Based Practice?

The Every Student Succeeds Act, the new reauthorization of the federal program designed to support the education of disadvantaged students, requires that states and districts use evidence-based interventions to support school improvement.

# Timperely 2011

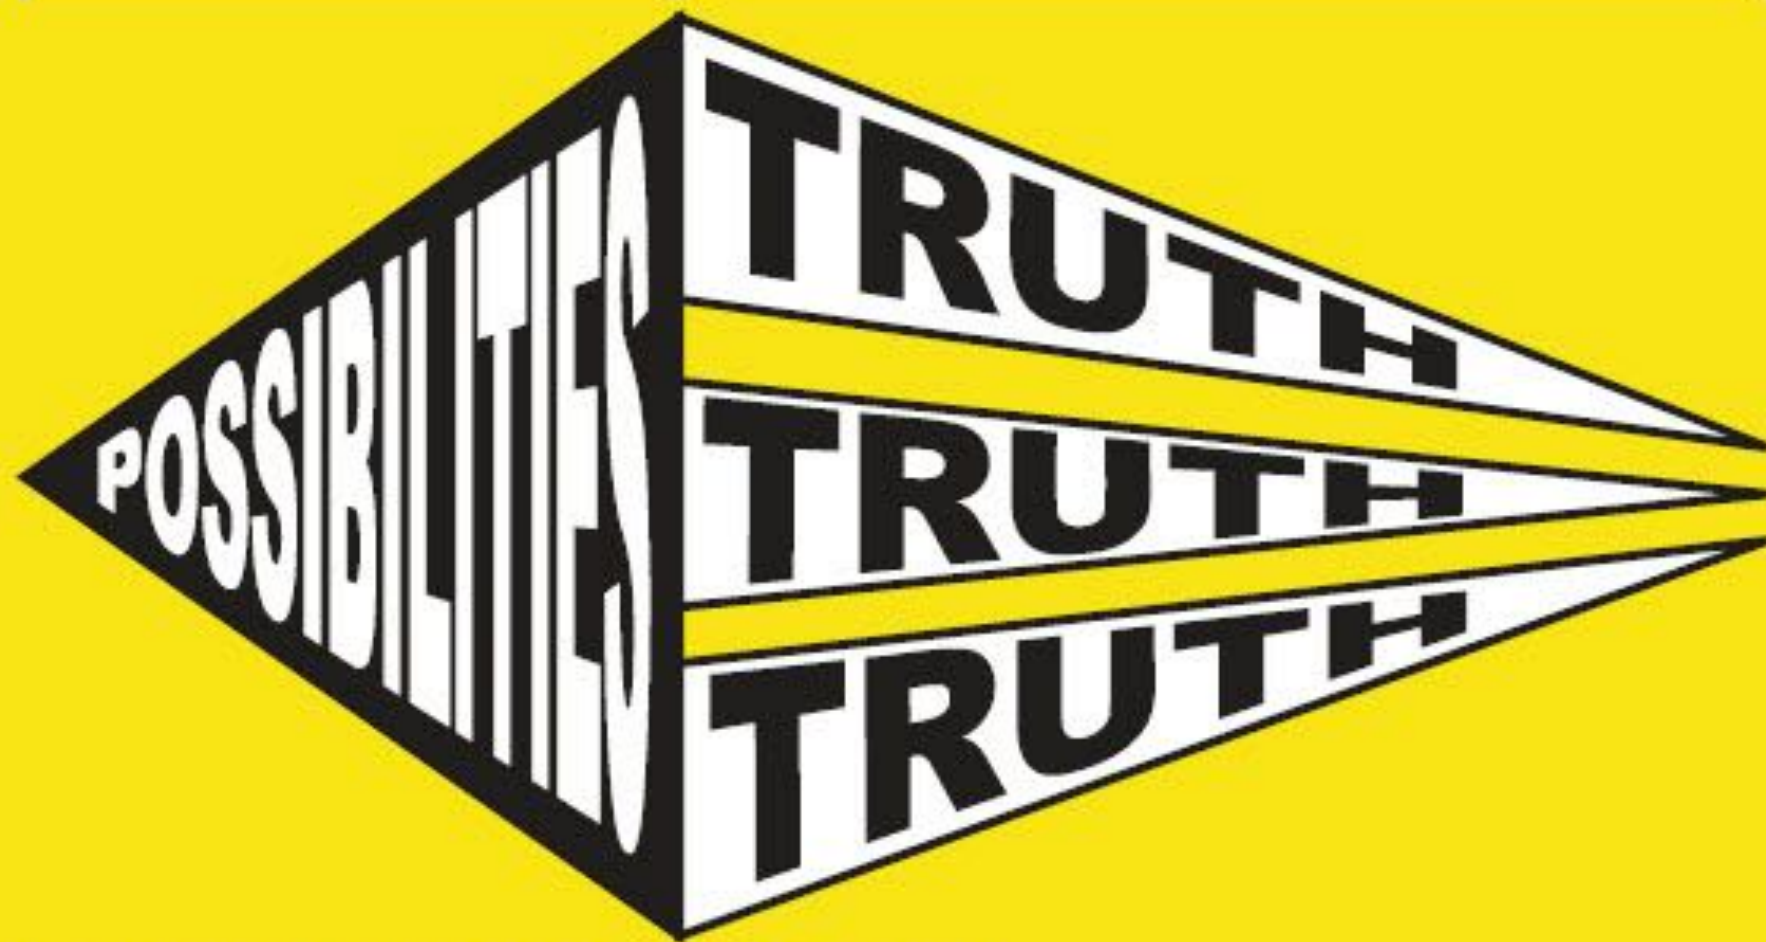

“...if teaching practice isn’t deeply informed by a wider knowledge about educational research, research based on direct observation of classroom activity, and the theory underpinning it, then teaching becomes a personal, rather than a professional enterprise.

# Evidence?

outcome of scientific research,  
organizational facts & data,  
benchmarking, best practices,  
collective experience, personal  
experience, intuition

**INDUCTION**

**DEDUCTION**

Evidence-based education operates at two levels. The first level is to utilise existing evidence from worldwide research and literature on education and associated subjects.

The second level is to establish sound evidence where existing evidence is lacking or of a questionable, uncertain, or weak nature.

All educators base their  
decisions on 'evidence'

# However ...

# Education is a fad-ridden profession

- We mistake opinion for fact
- Something written in a professional journal may be research but often is just opinions of the author
- Theories are just that - one has to do the research to prove or disprove a theory

Many educators pay little or no attention to the quality of the evidence they base their decisions on

Trust me, 20 years of leadership  
experience

So ...

Teach educators how to  
critically evaluate the validity,  
and generalizability of the  
evidence and help them find  
'the best available' evidence

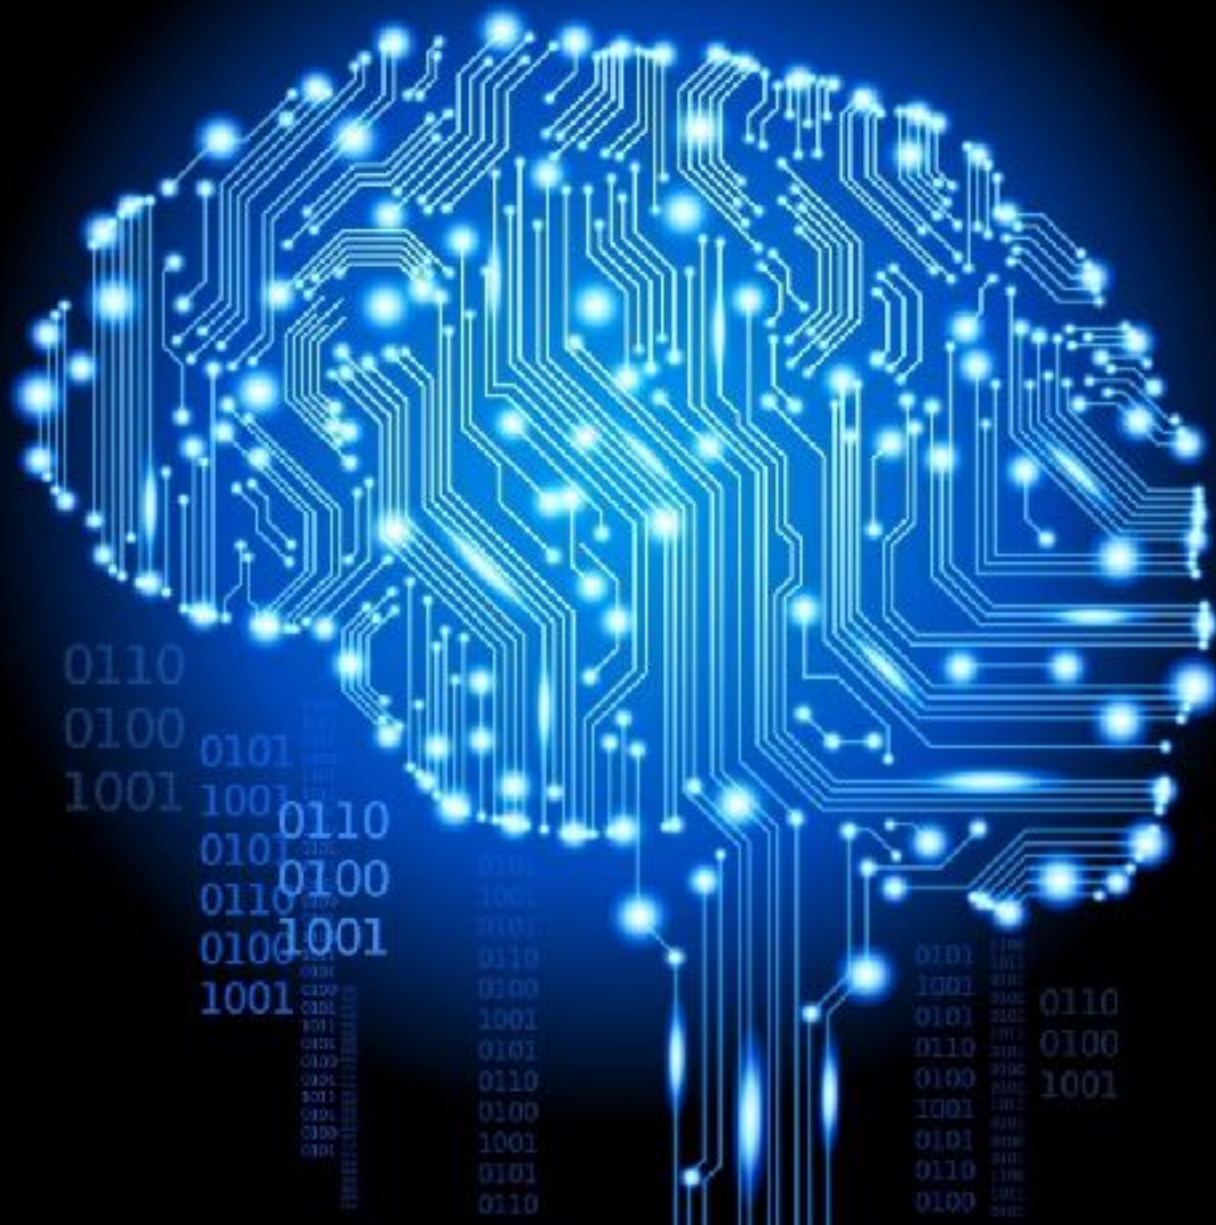

**EBP is a means  
to improve  
decision quality.**

# Evidence-based standards for effective teaching?

- Evidence about relationships between teacher skills, knowledge & behaviours and 'effectiveness'
- Evidence about what can be changed (and how)
- Based on 'best' theories of
  - Pupil learning
  - Pedagogy & teaching effectiveness
  - Behaviour change (individual, institutional, systemic)
- **Most important: does focusing on these things lead to improvement?**

**What kinds of skills,  
knowledge, behaviours,  
qualities and  
competences are  
required to be an  
excellent teacher?**

Evidence and theory from cognitive science about learning: how our brains acquire, make sense of and use information

# Education Effectiveness Research

wiseGEEK

**Evidence from...**

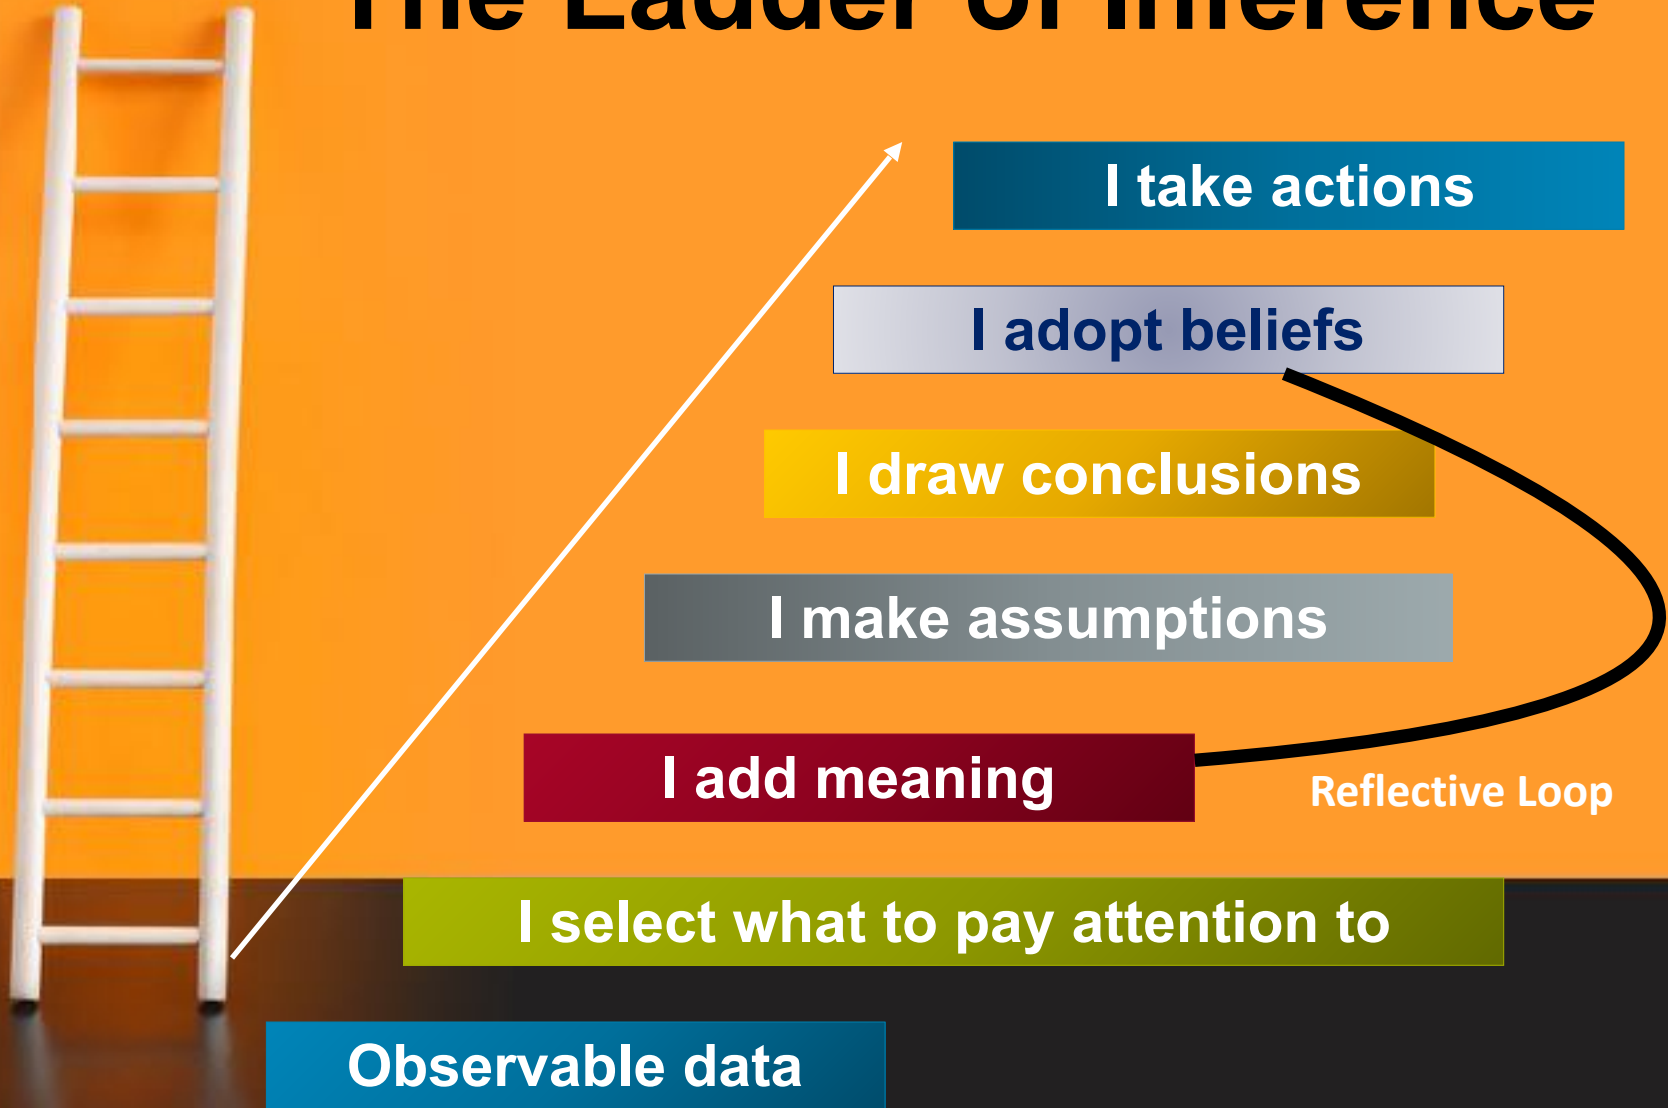

**Case Studies**

# How might we move forward?

- Review the best existing evidence about what excellent teaching looks like
- Review existing frameworks / protocols / evaluation instruments for identifying excellent teaching
- Develop/collect some self-assessment + feedback + discussion tools to allow teachers to assess and develop their skills/knowledge/practice in a range of dimensions
- Evaluate the impact (on a range of valued outcomes) of using them

# The Ladder of Inference

# ***Evidence-based decision***

# Evidence-based practice:

- Focuses on the decision making process
- Thinks in terms of probability (instead of golden bullets).

# Education is a fad-ridden profession

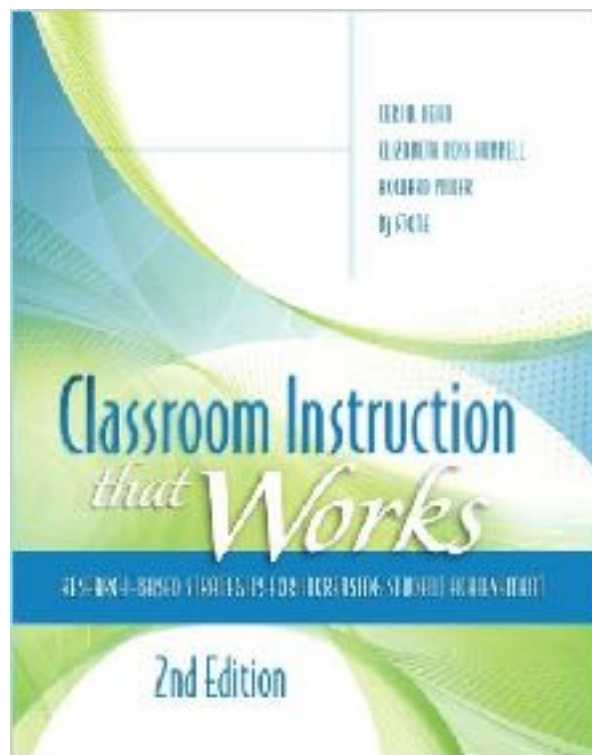

- We mistake opinion for fact
- Something written in a professional journal may be research but often is just opinions of the author
- Theories are just that - one has to do the research to prove or disprove a theory

# Fads - jump from Level 1 right into mainstream acceptance

## Examples

- ◆ Theory of Multiple Intelligences
- ◆ Integrated curriculum
- ◆ Block scheduling
- ◆ Piaget
- ◆ Learning styles

# Hattie's top classroom methods

1. Acceleration
2. Behaviour
3. Reciprocal teaching
4. Feedback
5. Spaced practice
6. Metacognitive strategies
7. Vocabulary programmes
8. Repeated reading
9. Creativity programmes
10. Self-verbalisation
11. Problem-solving
12. Not labelling students
13. Phonics
14. Cooperative learning
15. Direct instruction
16. Tactile stimulation
17. Comprehension

## Marzano/ Dean top classroom methods

1. Similes and analogies; similarities and differences
2. Note-making and summarizing
3. Growth mindset
4. Repetition (practice)
5. Graphical methods
6. Cooperative learning
7. Goals; Feedback
8. Hypothesis testing
9. Prior knowledge; advance organisers

## EEF top classroom methods

1. Feedback
2. Metacognition
3. Peer tutoring
4. Early years intervention
5. One to one tuition
6. Homework (secondary school)
7. Collaborative learning
8. Oral language intervention
9. Mastery learning
10. Phonics
11. Small group tuition
12. Behaviour interventions

## IAE principles (our simplified version)

1. Review previous learning
2. Present new material using small steps
  3. Ask questions
  4. Provide models
  5. Guide student practice
  6. Check for understanding
  7. Use high pass levels
8. Scaffold for difficult tasks
9. Independent practice
10. Weekly and monthly reviews.

## IES principles (our simplified version)

1. Space learning over time.
2. Interweave worked example solutions and problem-solving exercises.
3. Combine graphics with verbal descriptions.
4. Connect and integrate abstract and concrete representations of concepts.
5. Use quizzing to promote learning.
6. Help students allocate study time efficiently.
7. Teach students to identify content that needs further study.
8. Help students build explanations by asking and answering deep questions.

Reset

## Early years intervention

Moderate impact for very high cost, based on extensive evidence.

+5

## Extending school time

Low impact for moderate cost, based on moderate evidence.

+2

## Feedback

High impact for very low cost, based on moderate evidence.

+8

## Homework (Primary)

Low impact for very low cost, based on limited evidence.

+2

## Homework (Secondary)

Moderate impact for very low cost, based on moderate evidence.

+5

## Individualised instruction

Moderate impact for very low cost, based on moderate evidence.

+3

## Learning styles

Low impact for very low cost, based on limited evidence.

+2

# The Learning Cycle

		Hattie	EEF	Marzano	IAE	IES
Step 0: Set the scene	Behaviour	✓	✓			
	Mindset			✓		
Step 1: Activate prior knowledge	Assess prior knowledge			✓	✓	✓
	Fill missing knowledge					
Step 2: Present new material	Link to prior knowledge	✓		✓		
	Link abstract to concrete					✓
	Working memory limit				✓	
	Advance organisers			✓		
	Use graphics/ non-linguistic			✓		✓
Step 3: Set a challenging task	Challenge					
	Modelled/ worked examples	✓			✓	✓
	Metacognition	✓	✓			
	Collaborative		✓			
Step 4: Provide feedback	Feedback	✓	✓	✓	✓	
	Questioning		✓		✓	✓
Step 5: Repeat and reassess	Spaced repetition	✓			✓	✓
	Interweaved practice					✓
	Deliberate practice		✓	✓	✓	
	Progress check				✓	
	High pass level/ mastery	✓	✓		✓	

# VISIBLE THINKING

## PROMPT PICKER

\*Visible Thinking is a flexible instructional framework which simultaneously develops cognitive and non-cognitive skills. Thinking routines are simple patterns of conversation for exploring ideas. As student thinking is made visible, to themselves and their peers, opportunities for growth abound.

THESE CONCEPTS AND ROUTINES HAVE BEEN COMPILED AND ADAPTED FROM THE VISIBLE THINKING WEBSITE: [WWW.VISIBLETHINKING.ORG](http://WWW.VISIBLETHINKING.ORG)  
GRAPHICS AND MODIFICATIONS BY TRACY CLARK [WWW.TRACYCLARK.COM](http://WWW.TRACYCLARK.COM)

## A Taxonomy of Reflection

Creating: What should I do next?

Evaluating: How well did I do?

Analyzing: Do I see any patterns in what I did?

Applying: Where could I use this again?

Understanding: What was important about it?

Remembering: What did I do?

Model developed by Peter Pappas

# Dimensions of great teaching

1. (Pedagogical) content knowledge
2. Behaviour / control / classroom management
3. Classroom climate / relationships / expectations
4. Quality of instruction
5. Wider professional elements: collegiality, development, relationships
6. **Research knowledge**

# How research might help

- Research knowledge
  - Informs pedagogical practice
  - Informs decisions about strategy and policies
  - Informs attempts to implement and embed more effective practices
- Research mindset
  - Robustly evaluates ongoing performance on a range of outcomes
  - Evaluates the impact of any changes made
  - Adopts a critical perspective: ‘show me the evidence’

# What we need to do

- Encourage our teachers to use curriculum and instruction that have evidence to support their use
- Discourage teachers from picking and choosing based on their personal preference
- Grossen, “To be a profession is to have a professional-knowledge base comprised of shared procedures that work.”
