

eSchool Support Services

- Education services are provided virtually—there are no residential services provided in person.
- Education services include instruction and interventions, testing and evaluations, and limited support services (e.g. OT/PT, psych, speech, etc.)
- Support services gather and address data related to services needed to succeed in the academic setting only.
- Testing for referral and re-evaluation must be in person at a Provo City School District location.
- Students may be required to take additional evaluative testing recommended by eSchool staff in order to complete referrals, eligibilities, and student goals.
- All students/parents should provide an appropriate environment for virtual services. Quiet, distraction-free settings aid student learning.
- Missing support service sessions is akin to missing class and can lead to truancy.
- If a student needs specific interventions not provided in the virtual setting, a recommendation will be made for the student to attend their neighborhood school.
