Student Projections Flowchart

Provo School District Development

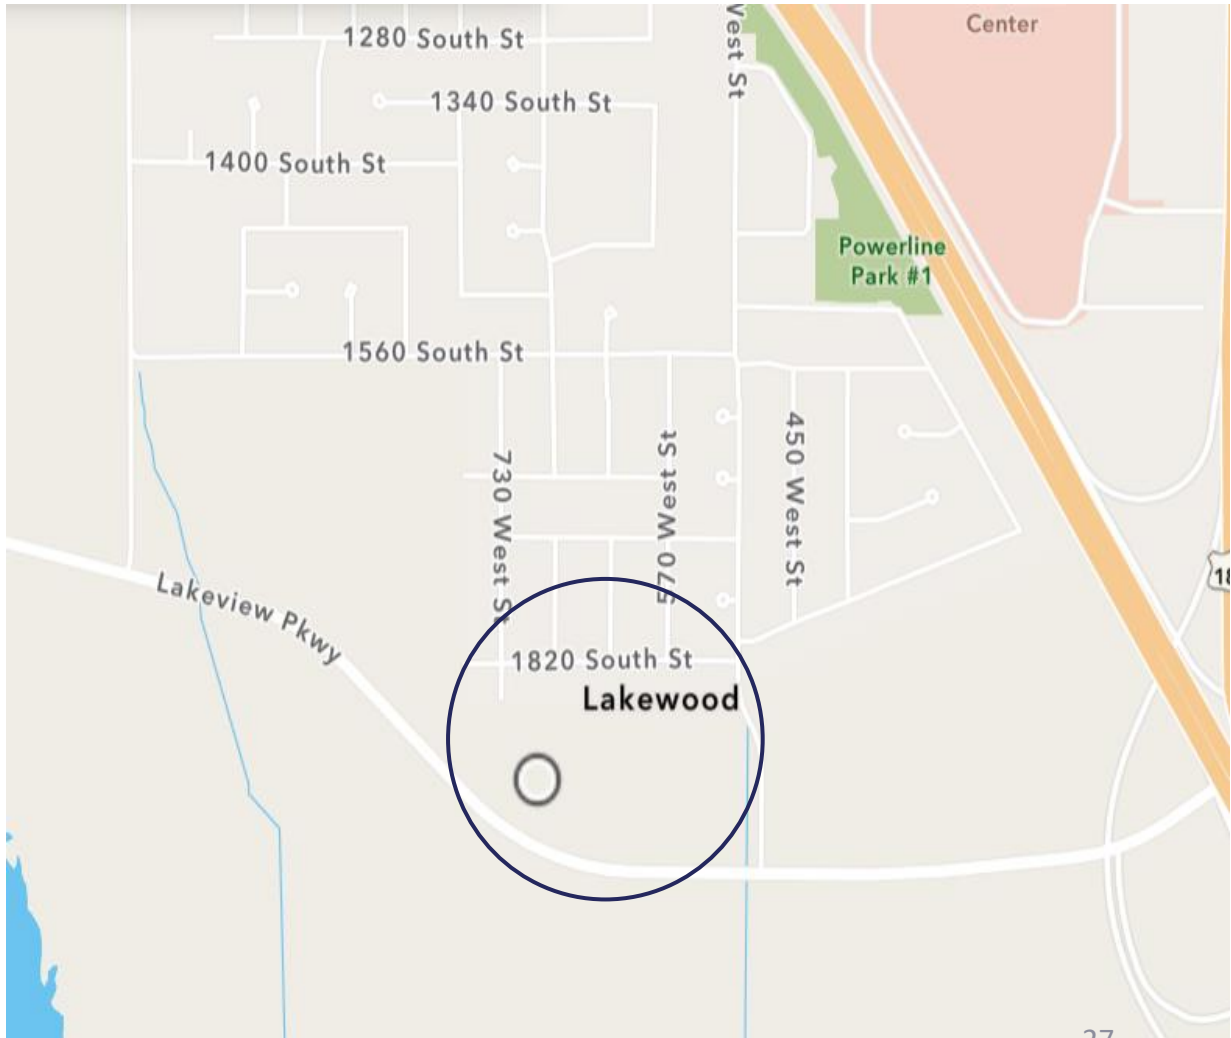

Provo School District Student Yield Samples

Broadview Shores

Ospray Townhomes

Provo School District Student Yield

Broadview Shores Student Yield:

**74 students / 115 houses =
0.64 or 6 students per 10 houses**

Ospray Townhomes Student Yield:

**12 students/149 townhomes =
0.08 or less than 1 student per 10 townhomes**

Methodology

Enrollment projections are an estimate of future activity.

Average Percentage Increase Model

Calculates future school enrollment growth based on the historical average growth from year to year.

Linear Regression Model

Estimates by performing calculations on known historical values and to create future values to provide a trend line. MGT has chosen a “straight-line” model to estimate future enrollment values that finds the best fit based on the historical data.

Cohort Survival Model

This model calculates the growth or decline in a grade level over a period of five years based on the ratio of students who attend each of the previous years, or the “survival rate.”

Student-Age of Population Model

Utilizes age related population data to indicate the number of students within each school level that can be expected based upon population projections to project future enrollment.

Weighted Average

Average of each of models to reflect the trends and the over-arching themes to maximize the strengths of each of the base models.

Historical and Projected Enrollment by Grade Band

Develop and Validate Building Capacity

Functional Capacity is a choice:

- Facility's age and condition,
- Space functionality
- Program priorities
- Student needs (STEM, dual language, special education, art and physical education, and career and technical spaces)

Functional Capacity is developed using:

- Staffing worksheets
- Building plans and layouts
- Loading standards
- Current enrollment
- Intensive support rooms
- PreK classrooms
- Special programs
- Portables

MGT reviewed PCSD's current capacities, facility maps, and program requirements in partnership with division leadership and building staff.

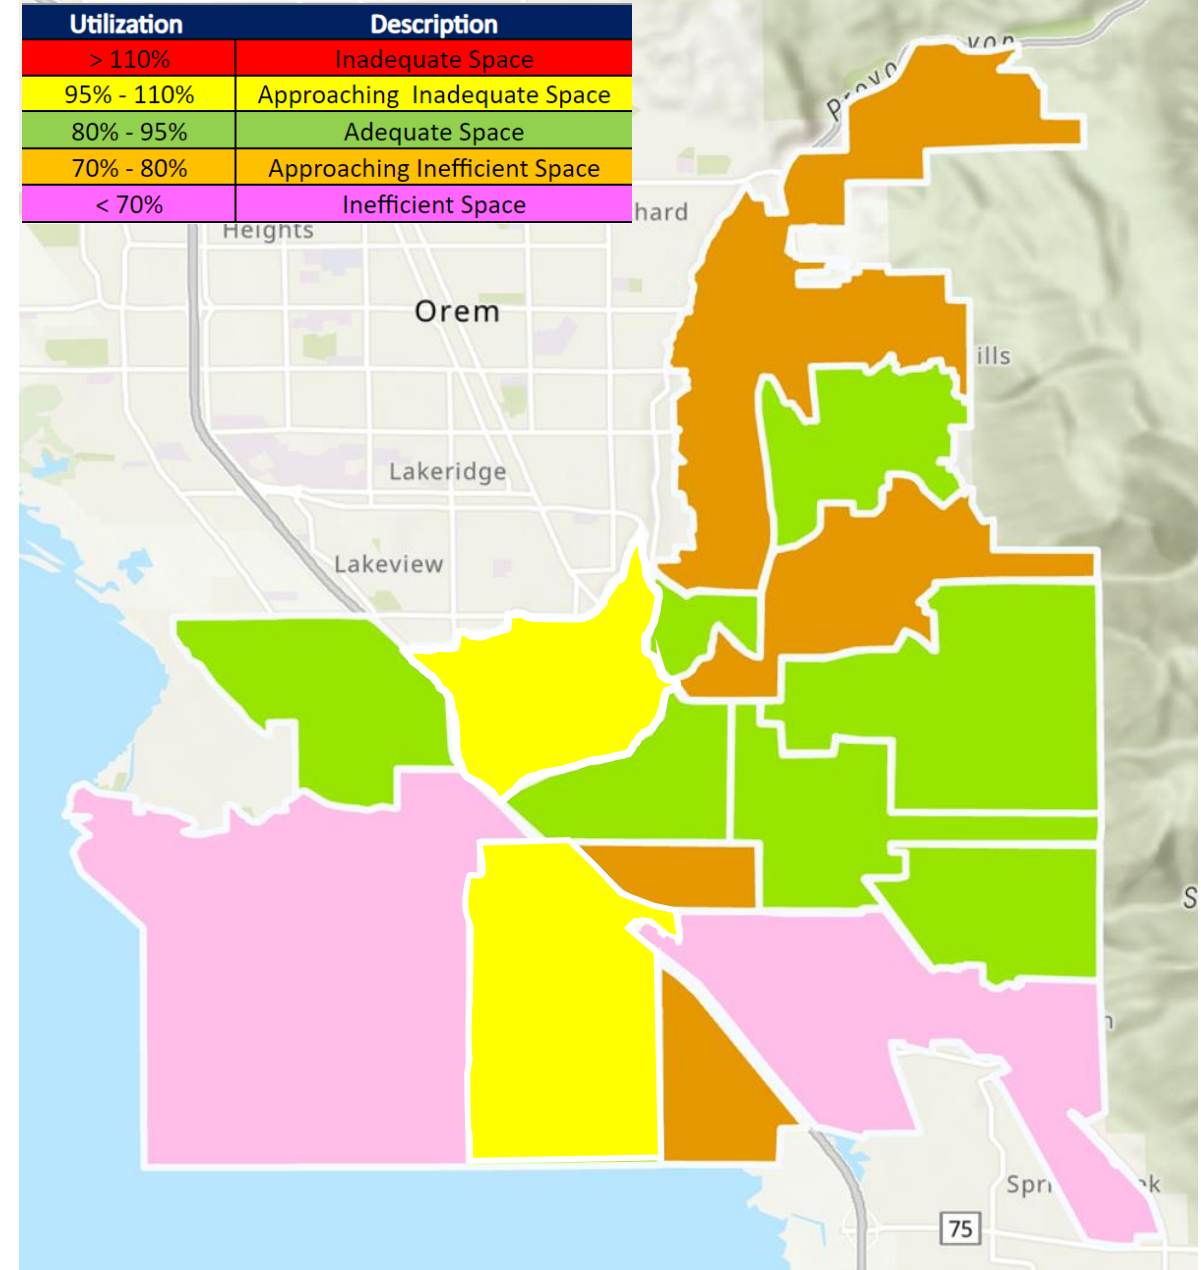

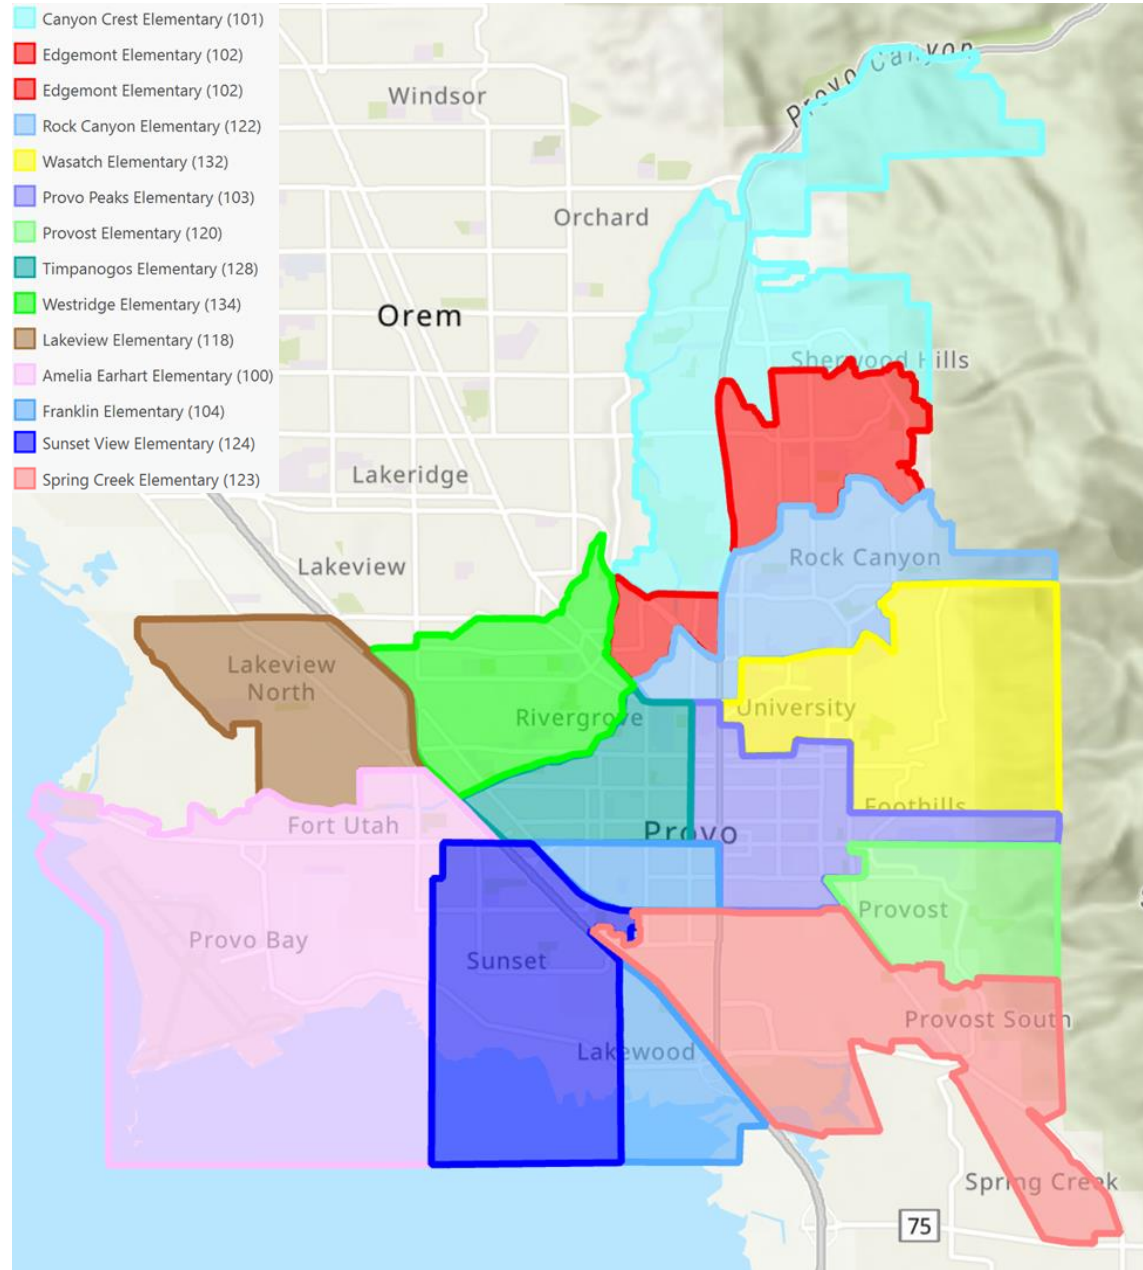

Capacity and Utilization

Work with district staff to understand current program offerings, capacity, and utilization numbers for each building.

| Efficiency Rate | Description | Number of Schools |
|-----------------|--------------------------------------|-------------------|
| > 110 | Inadequate Space | 0 |
| 95 - 110 | Approaching Inadequate Space | 3 |
| 80 - 95 | Adequate Space | 8 |
| 70 - 80 | Approaching Inefficient Use of Space | 3 |
| < 70 | Inefficient Use of Space | 2 |

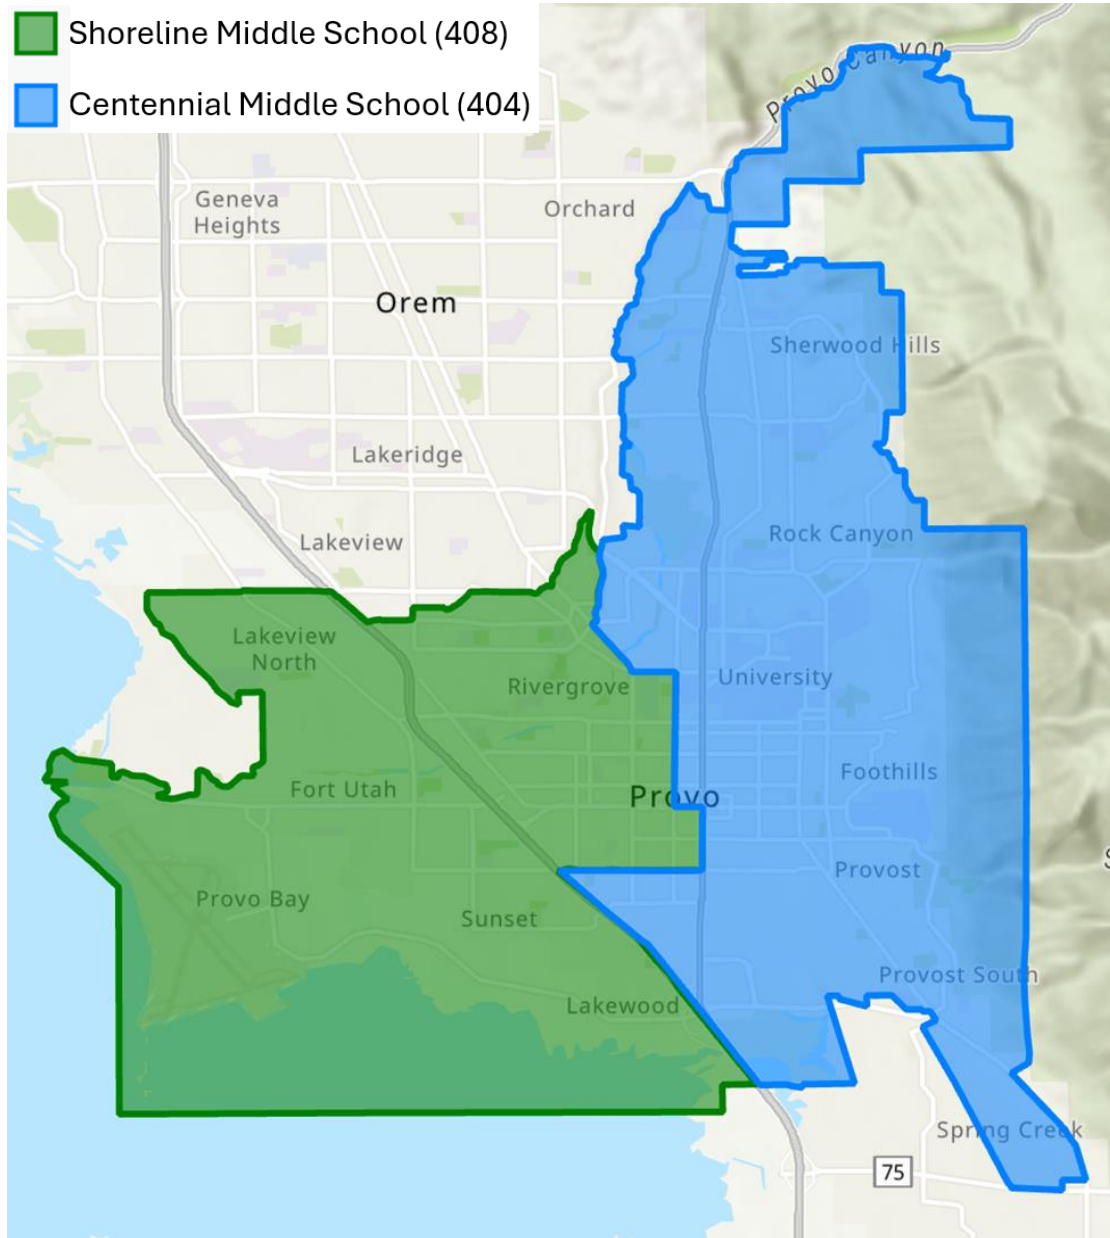

| School | Current Enrollment | Maximum Capacity | Target Capacity | Utilization |
|---|--------------------|------------------|-----------------|---------------|
| Provo High School | 2018 | 2195 | 2085 | 96.80% |
| Timpview High School | 2305 | 2594 | 2464 | 93.55% |
| High School Total/Avg | 4323 | 4788 | 4549 | 95.04% |

| District Total/Avg | 13,265 | 16,358 | 15,540 | 85.36% |

Capacity and Utilization

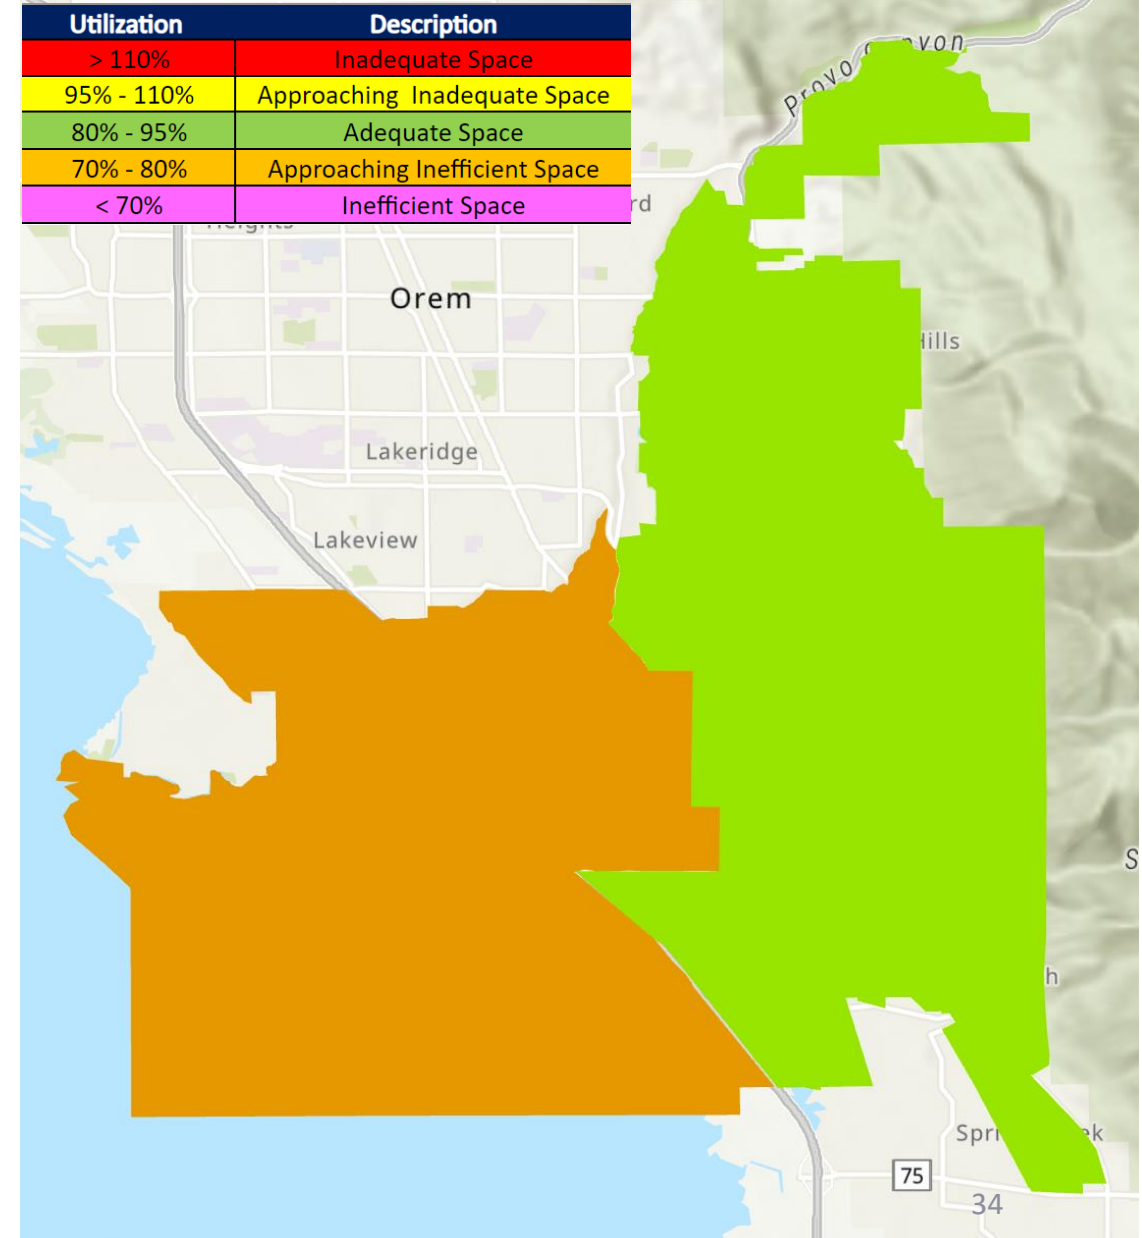

Capacity and Utilization

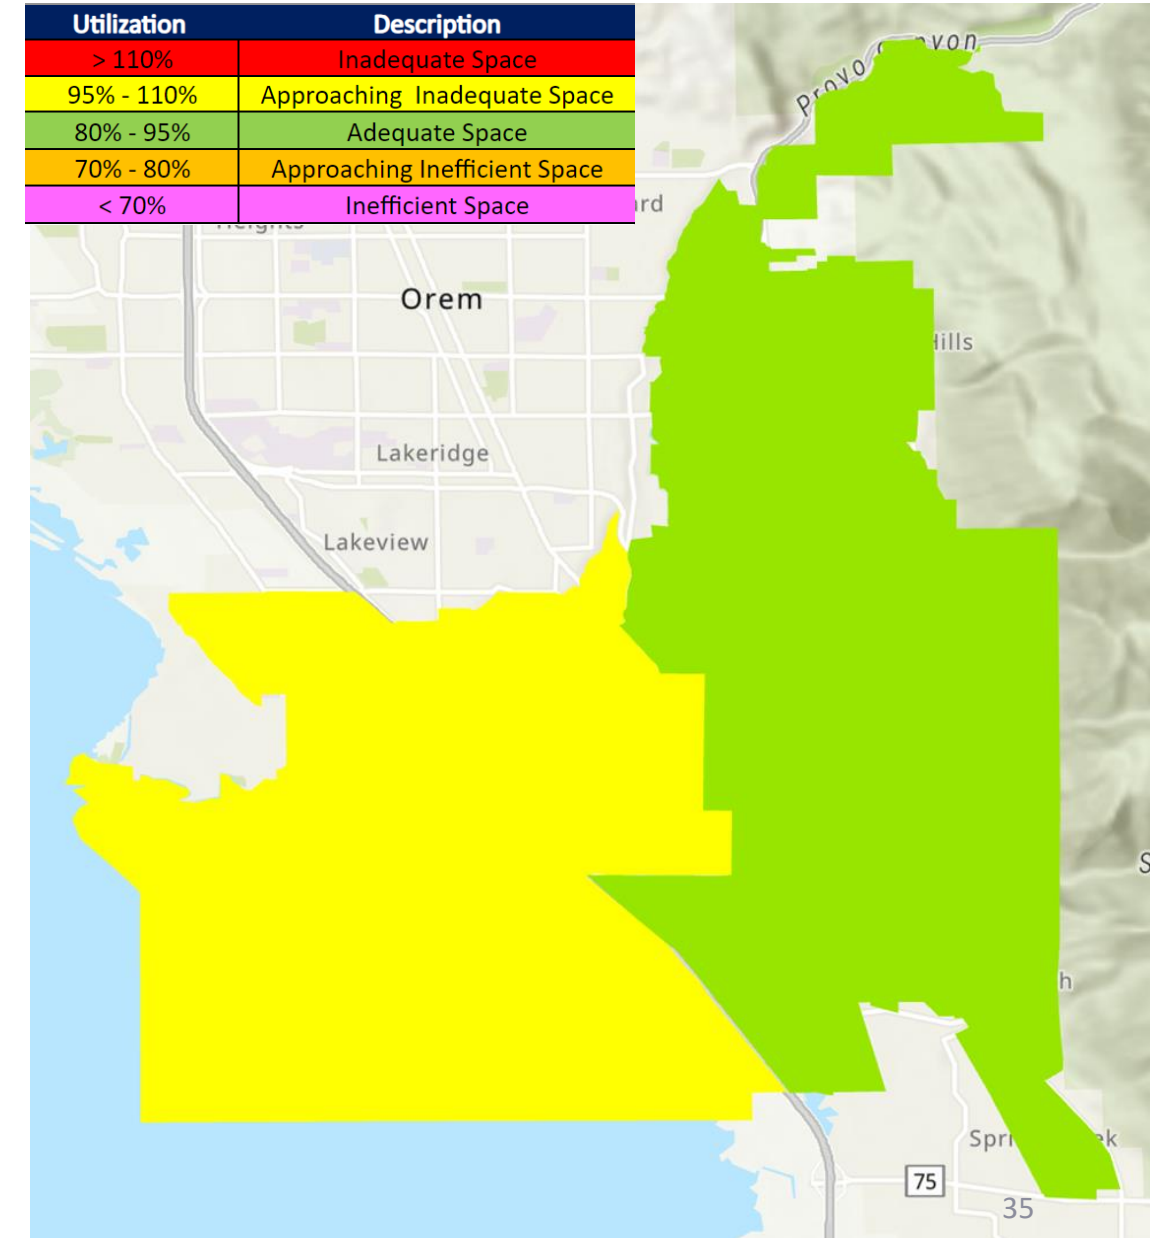

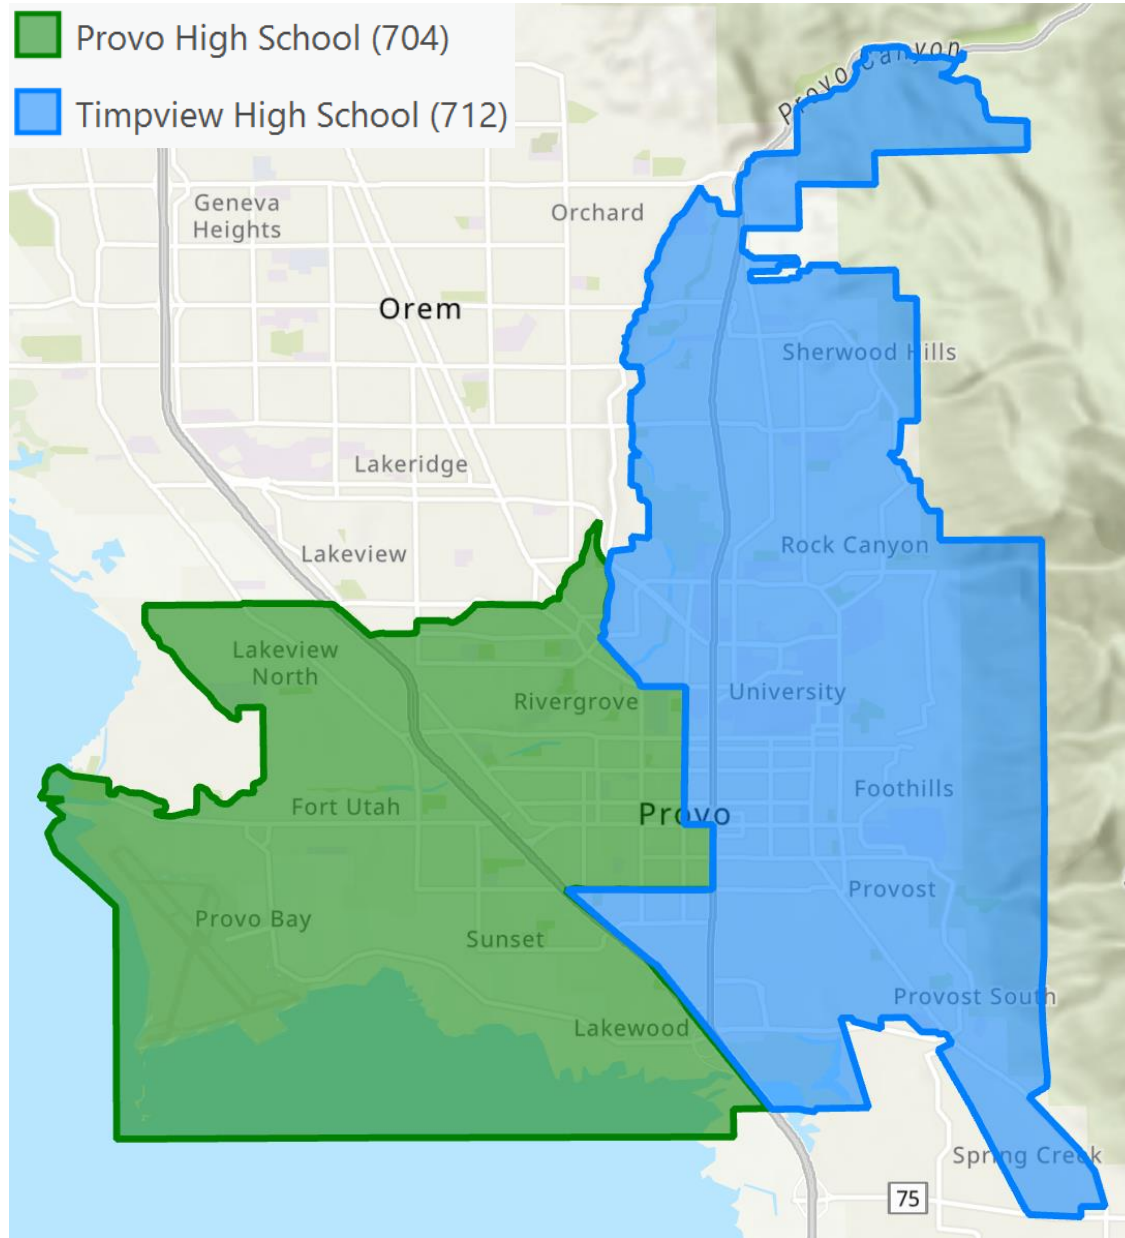

- Shoreline Middle School (408)
- Centennial Middle School (404)

| Utilization | Description |
|-------------|-------------------------------|
| > 110% | Inadequate Space |
| 95% - 110% | Approaching Inadequate Space |
| 80% - 95% | Adequate Space |
| 70% - 80% | Approaching Inefficient Space |
| < 70% | Inefficient Space |

Capacity and Utilization

Potential Attendance Zone Adjustment Considerations

Transportation

- Ensuring efficient and effective student transportation routes while working to limit the amount of time required on a bus.

Impact

- The total number of students impacted by boundary adjustments.

Special Programs and Populations

- Minimize disruption and impacts to special programs or special populations (e.g., free-and-reduced lunch programs, economically disadvantaged, DLI, G/T, special education).

Neighborhood Schools

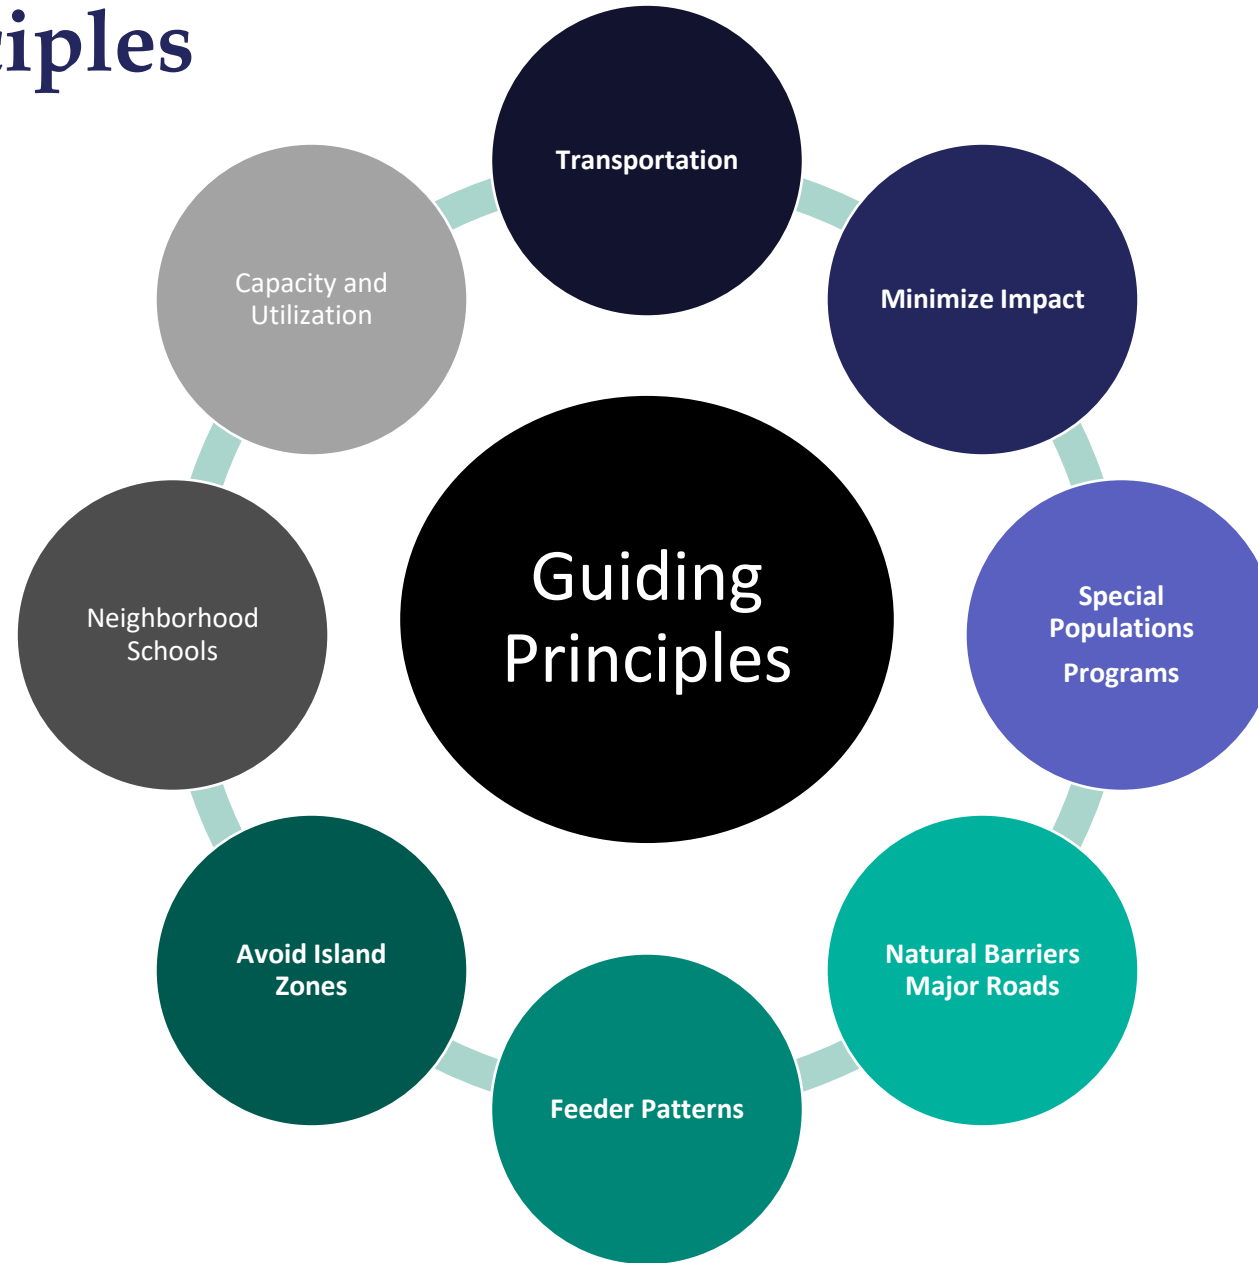

- Prioritizing schools that serve students within their local neighborhoods and avoid “island zones.”

Capacity and Utilization

- Optimizing the use of school facilities to match current and projected enrollment balancing utilization at the current, 5-year, and 10-year forecasted trends.

Guiding Principles Examples

- Criteria may conflict with one another.
- Criteria drive Board and Leadership considerations.

- Criteria should be balanced to meet District needs.
- Criteria can be used to identify unintended consequences.

Community Engagement Summary

The majority of the **635 participants** were *Parent/Guardian of Districts Student(s)*, followed by *District Staff Member*, then *Community Members*.

The overall perception of the condition of school facilities was they are “good” (51%). A distinct portion (27%) of respondents believed the conditions to be “Excellent.” **78% see school facilities as Good/Excellent.**

The top 2 most important planning objectives at **36% and 33%** each were “*Equitable Facilities District-Wide*” and “*Enhanced Educational Opportunities.*” Strong support at **69%** for **CTE and STEM**.

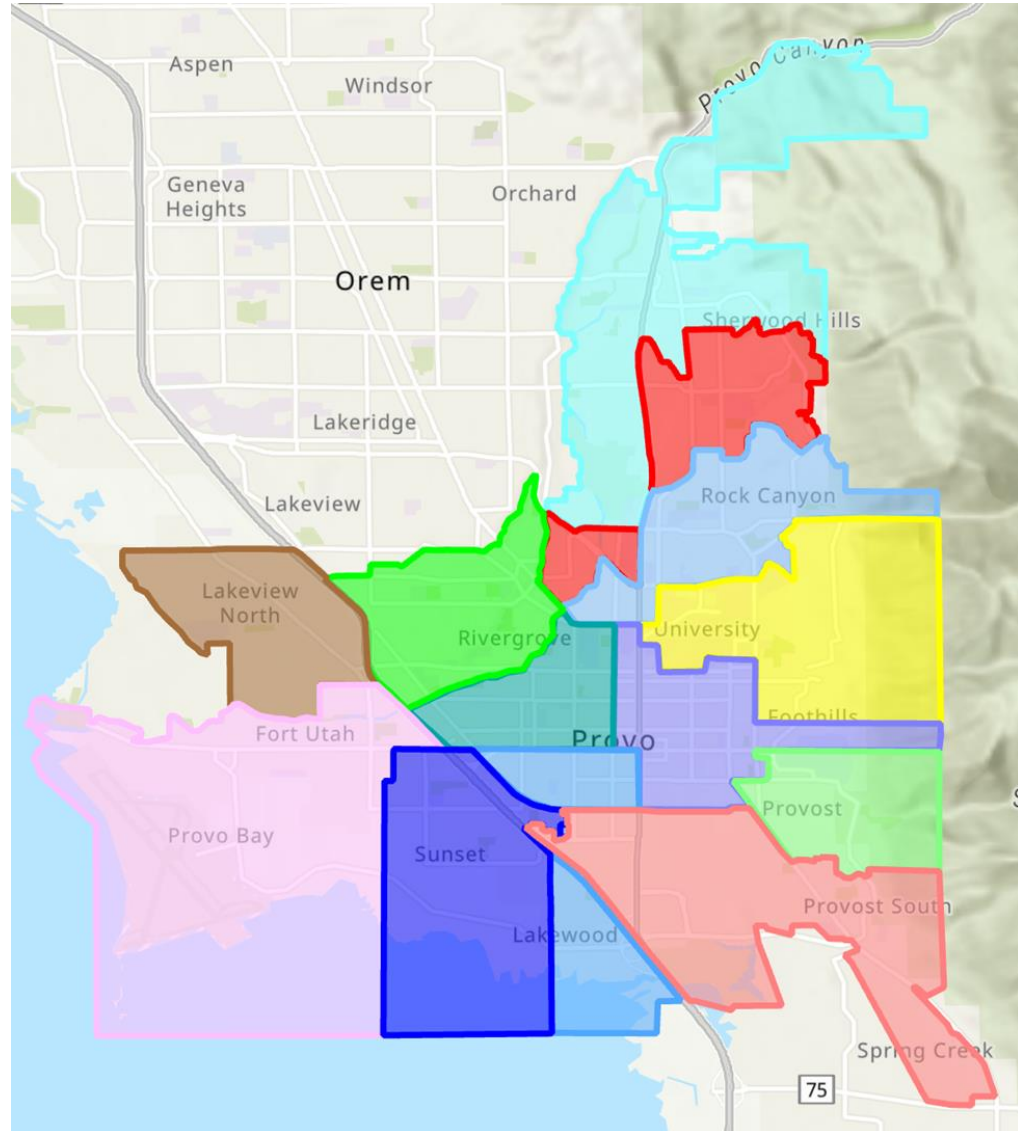

In terms of requirements (Guiding Principles) for school facilities, “*Neighborhood Schools*” (57%), “*Special Programs and Populations*” (40%), and “*Capacity and Utilization*” (40%) were the top 3 choices.

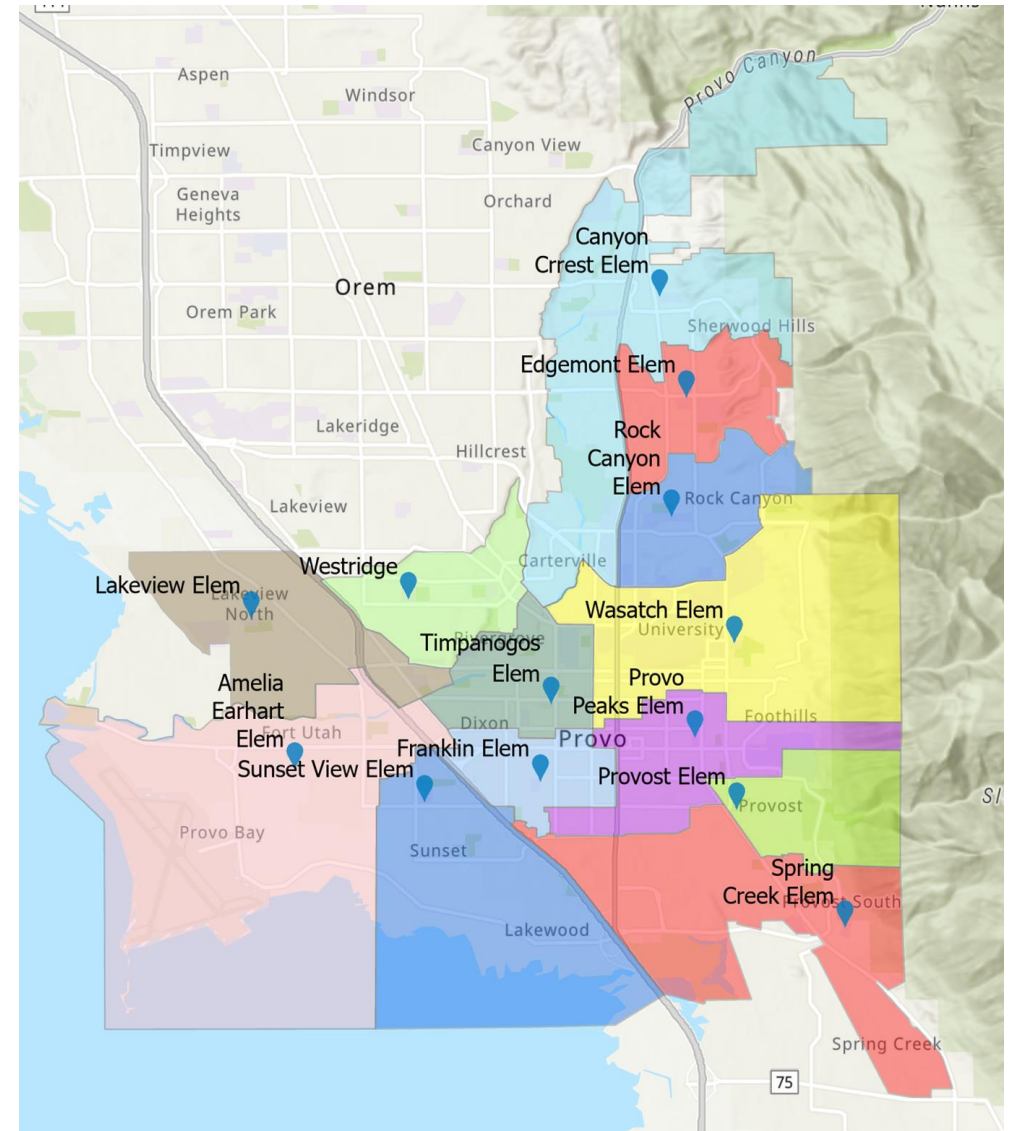

The majority (75%) of participants agreed they would **support redrawing school attendance zones to make better use of facilities and plan for future growth**, even if it results in changes to services such as transportation schedules.
